

Research Opportunity!

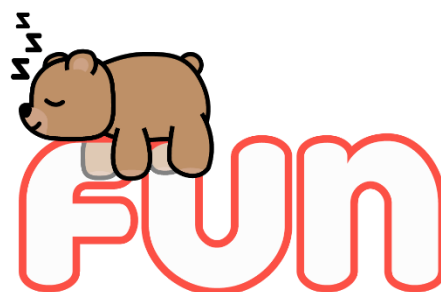

We need your help!

We are trying to find out about the **FATIGUE** experienced by children with different levels of hearing.

If you manage children who have HEARING LOSS, you can help us!

We would like you to take part in an interview with us lasting 30-60 minutes, to discuss fatigue and unilateral hearing loss.

This can be face-to-face, over telephone or video call.

Sounds interesting? To find out more, contact **Bethany Adams** for more information.
