Cochlear Implant Information Day 2022

Dear Colleagues,

You are cordially invited to our Cochlear implant information Day on the **29th of September, 2022**.

St George's Auditory Implant Service is hosting a day for all clinical professionals considering a referral to CI for their patients or working with newly implanted patients. The Cochlear implant information day is a wonderful opportunity for us to network and hear about Cochlear implant assessments, pathways, and recent medical and technological advancements in the field of cochlear implants. There will be presentations from all disciplines across the implant service, including ENT, AVP, Audiology and rehabilitation.

The day will be sponsored by Cochlear Ltd, and there will be hands on opportunity to see some of the implants and processors.

This year's information day will have a strong Paediatric CI focus, so we encourage especially professionals that work with the paediatric population to register your interest as soon as possible.

Please contact us by email to register at ais@stgeorges.nhs.uk. The spaces are limited and will be based on a first come first served basis, so please do register your place as soon as possible to avoid disappointment.

Yours sincerely,

St. George's Auditory Implant Service
